I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

## **DETAILED ACTION**

### ***Response to Arguments***

1. Applicant's arguments, see pages 9-13, filed 24 July 2008, with respect to the rejections of claims 12-20 under 35 U.S.C. § 103(a) have been fully considered and are persuasive. Therefore, the rejections of claims 12-20 under 35 U.S.C. § 103(a) have been withdrawn. Examiner agrees that the presently amended claims are not taught by the prior art of record. Further, Examiner has not discovered any additional prior art which teaches the presently amended claims, either alone or in combination. Accordingly, claims 12-20 are deemed allowable over the prior art.

### ***Allowable Subject Matter***

2. Claims 12-20 are allowed.

The following is an examiner's statement of reasons for allowance:

Independent claim 12 recites a method for mapping a first color gamut onto a second color gamut. The mapping based largely on setting both surface and internal gradient lines. The surface gradient lines are based on sample points on the surface of the first color gamut and corresponding sample points on the surface of the second color gamut. The internal gradient lines are based on sample points inside the first color gamut and corresponding sample points inside the second color gamut. Furthermore, as amended in Applicant's reply of 24 July 2008, one of the surface gradation lines are defined by a function indicating a continuous locus linking the plurality of sample points in the first sample points, and one of the internal gradation lines being defined by a function indicating a continuous locus linking the plurality of sample points in the first sample points. By setting the color mapping thusly, color changes in the first color gamut can be efficiently mapped to the second color gamut with high accuracy. This particular type of color gamut mapping is not taught by the previously cited prior art references, nor has Examiner discovered any additional prior art which anticipates claim 12 and/or renders claim 12 obvious to one of ordinary skill in the art at the time of the invention. Accordingly, claim 12 is deemed to be allowable over the prior art.

Claims 13-15, 18 and 19 each depend from claim 12, and are therefore deemed allowable at least owing to their respective dependencies.

Claim 16 recites an apparatus that performs the method of claim 12. Therefore, claim 16 is deemed allowable for reasons similar to those given for claim 12.

Claim 17 recites a computer-readable storage medium which storage a computer-executable program which causes a computer to execute the method of claim 12. Therefore, claim 17 is deemed allowable for reasons similar to those given for claim 12.

Claim 20 recites a method for mapping a first color gamut onto a second color gamut. The method is similar to, but more limiting than, the method recited in claim 12 and contains the same allowable subject matter recited in claim 12. Therefore, claim 20 is deemed allowable for reasons similar to those given for claim 12.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
